Job Description

Open Date: 07/13/2010 Close Date: 08/13/2010 Summary of Responsibilities Under direct supervision and based on apprenticeship-level expertise, general experience and/or academic study, provide routine technical support for an area of assignment, typically an experimental or support group. Depending on area of assignment, fabricate, set-up, calibrate, operate, test, repair and/or modify a variety of electrical-electronic and/or mechanical equipment, systems and devices, and/or perform Environment, Safety and Health (ES & H) duties including environmental surveys, waste disposal and radiological surveys. Respect, understand and value individual differences that embody the principles of diversity. Abide by all environmental, safety, and health regulations. Minimum Qualification Requirements High School Diploma (or equivalent). 2+ years experience. Under the direction of an engineer or a senior technical person, the selected candidate will perform a variety of duties as assigned for the Mechanical Support Department of the Accelerator Division, including working as part of a team on the assembly and installation of electromechanical systems from blueprints and mechanical drawings, and to maintain systems to support operations. The opportunity to assist with the maintenance and operation of Radioactivated Water (RAW) and compressed gas systems will also be involved. The selected candidate will also work to maintain cryogenic, ultra high vacuum systems and perform helium leak testing on systems and components. In addition to the above Minimum Qualification Requirements, candidates must possess the following Preferred Qualification Requirements to be considered highly qualified for the position. Applicants must describe how they meet the following preferred competencies in their application materials. Preferred Qualification Requirements *Must be at least 18 years of age. *Knowledge of and skill in the operation of basic mechanical equipment. *At least two (2) years experience in the operation and/or repair of mechanical systems. *Ability to work from blueprints and mechanical drawings. *Demonstrated skill in the use of common hand and power tools. *Familiarity with the use of precision measuring equipment. *Ability to operate overhead cranes, rigging and various types of forklifts. *Basic skill in the use of computers for electronic mail and data entry, as well as for work using Microsoft Office. *Ability to work from both verbal and written instructions. *Good communication skills. *Knowledge of the millwright profession; exposure to welding, brazing and soldering; and/or experience with machine moving and pump repair are all beneficial. *Experience working in a clean room environment and/or with vacuum related components is advantageous. Physical Activity/Requirements HUMAN FACTORS: Heavy Lifting, Heights, Mental Concentration, Repetitive Motion, Sitting, Standing, Tight Work Schedule, Vibrating Equipment, Visually Demanding, Work Outdoors *Ability and willingness to respond to emergency call-in as well as work rotating shifts and mandatory overtime. *Ability and willingness to carry and respond to a pager. *Ability to legally operate cars and light trucks. *Ability to perform sustained manual labor. CHEMICAL FACTORS: Chemicals, Dust, Epoxies, Lead,

Solvents, Welding
PHYSICAL FACTORS: Confined Space, Cryogenics, Environment (Cold, Dry, Hot, Wet), High Magnetic Field, High Noise Level, High Voltage, Ionizing Radiation, Oxygen Deficiency Hazard*Ability to qualify for work in Oxygen Deficiency Hazard (ODH) designated areas as well as in radiologically controlled areas. PERSONAL PROTECTION EQUIPMENT: Eye/Face Protection, Foot Protection, Hand Protection, Hearing Protection, Respirators
BIOLOGICAL FACTORS: Insects

MIG/TIG Welders Job type: Full-Time | Pay: \$11.00 - \$12.00/hour

Chase Professionals is currently hiring several welders for a client near Rosemont IL.

These will be temp to perm opportunities! Candidates must...

Job Description

WE ARE LOOKING FOR A WELDER WITH TIG ON ALUMINUM EXPERIENCE

GENERAL DUTIES:

The position you are applying for may not require expertise knowledge in all of the following but all Welders should have a general understanding of the following:

- Be able to do a downward vertical TIG weld on thin gauge aluminum
- Drill, grind, chip and brush metal using common hand tools.
- Use and maintain oxyacetylene, electric arc and spot welding equipment.
- Weld ferrous and non-ferrous metals.
- Braze and solder metals.
- Perform inert gas welding, flame cutting, flame heating and heat treating techniques on metal.
- Form, bend and straighten metals by forging

Job Requirements

SKILLS:

In addition to having good manual skills, welders must have a knowledge of metallurgy and relevant codes, regulations and laws and be able to:

- Communicate clearly and read and follow blueprints.
- Operate hand and power tools.
- Plan and think sequentially and three-dimensionally.
- Work on scaffolds and ladders and sometimes make repairs in awkward or cramped locations.
